closed (31 December 2021)

Message from the Guest Editor

In the Industry 4.0 era, the manufacturing industry is continuously challenged by the market to improve product quality, increase production efficiency, ensure safety, and enhance sustainability while maintaining agility in manufacturing products and satisfying customer demand. Digital technologies such as smart wearables, or augmented/virtual/mixed reality are undoubtedly the driving force behind manufacturing agility through making the right information accessible at the right time. Moreover, informed decision making as well as smart production planning and scheduling drive manufacturing agility in the Industry 4.0 context. An intelligent production planning, scheduling, and control system have an incredibly important role in collecting, processing, and inferring the industrial data for making informed and right decisions instantaneously. The efficient, flexible, and reliable logistics system is also an indispensable part of sustainable and agile manufacturing.

The main aim of this Special Issue is to publish a collection of high-quality research papers on sustainable and agile manufacturing, including both review and original research articles.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
