Message from the Guest Editors

In recent decades, we have observed an increased number of disasters that strongly determine the markets' and countries' long-term economic growth. Natural disasters, such as floods, droughts, and wildfires, which cause loss of life, damage property, and bring food insecurity, are widely expected to become more prevalent due to climate change. The recent global pandemic reveals not only the devastating impact of COVID-19 on global health but also the sensitivity of global and local supply chains to exogenous shocks.

The impact of disasters on the economy depends not only on the severity of these adverse event, but also on market structure that may either bring some resilience or strengthen the negative consequences of such shocks. The goal of this Special Issue is to gather original research on disaster and market structure that will provide a better understanding of the role of market structure on transmission of shocks caused by disasters.

Therefore, we are considering contributions that develop different approaches or perspectives to disasters within a resilience framework, presenting theoretical papers, empirical work or case studies, but also literature reviews.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
