Message from the Guest Editors

The aim of this special issue is to collect new ideas on the application of nanocomposites technology in sustainable material development and application through evidence obtained from high impact research and evaluation methods. Furthermore, in this special issue, we hope to showcase selected original and innovative papers, highlighting the most challenging aspects related to sustainable nanocomposites. Concepts, challenges, perspectives and opportunities will clarify the dynamics and foresight of the application of sustainable materials in high-tech fields, especially considering the sustainable development goals and the priorities of raw materials in circular economy. The summary review of nanocomposites technology in the field of sustainable material development and application is also welcome.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
