Message from the Collection Editor

Dear Colleagues,

Trends in sustainability is a valuable potential topic related to corporate finance and sustainability that is very wide and can be understood in connection with company valuation and various aspects of corporate-finance fields that can be included in scientific and expert discussion (e.g., working capital management, long-term asset management, capital structure optimization, cost and liquidity management, financial analysis and planning, and securities valuation). Other researchers and experts interested in this topic are welcome, and I look forward to your contributions.
