Message from the Guest Editors

The pursuit of sustainability has received extensive attention in recent decades in both practice and research. Innovations in operations management have provided effective tools to help sustainability advancement through, for example, product development and eco-design, lean manufacturing processes, ethical material sourcing, streamlining shipping and distribution, reverse logistics, etc.

This Special Issue aims to stimulate novel research in operations and supply chain management that helps realize sustainable development goals. Contributions exploring sustainability progress and challenges from diverse areas in operations and supply chain management are welcome. Sustainability research on both highly developed societies and emerging economies is encouraged. Contributions that identify and assess innovative sustainable development under the influence of the pandemic/post-pandemic economic environment or supply chain disruption are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
