### **Dr. Alireza Daneshkhah**

Data Science and AI, School of Mathematics and Data Science, Emirates Aviation University, Dubai, United Arab Emirates

Deadline for manuscript submissions:

**closed (20 September 2024)**

### **Message from the Guest Editors**

Operations research (OR) is a scientific approach for implementing advanced analytical methods to enhance decision-making in complex systems management. OR can be applied to every sector and industry that pursues continuous improvement, advancements and quality.

With this Special Issue, we aim to explore the innovative development and applicability of operations research for optimization, resilience and sustainability resolutions using advanced data analytics, simulation and modeling techniques. This research stream cuts across several research areas and disciplines, such as complex systems, data science, problem solving, decision making, system analysis, cost, strategic planning, net-zero, Industry 4.0 and 5.0, etc. Research areas may include (but not limited to) the following:

- Complex systems and optimization.
- Sustainability and net-zero.
- Industry 5.0 and social values.
- Business systems and operation.
- Systems thinking and decision making.
- Analytical modelling and simulation.
- Resilience and operational excellence.
- Data science and AI.
- Proactive/preventive maintenance.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
