### Message from the Guest Editors

In this line, this is the time to, first, synthesize different research fragments on CSR, second, combine CSR with an additional unique agenda (e.g., human rights, win-win partnership, official development assistance), and third, compile all the theoretical and empirical studies for organizational sustainability. We welcome submissions from various disciplines but are not limited to the following topics:

- Corporate social responsibility as part of organizational strategy;
- Corporate social responsibility as conduit for sustainable growth;
- Corporate social responsibility as a means for win-win partnerships;
- Corporate social responsibility associated with human rights;
- Corporate social responsibility related to official development assistance;
- Stakeholder influences on corporate social responsibility in various disciplines;
- Institutional pressures for corporate social responsibility in diverse domains;
- Relationship between the level of corporate social responsibility and long-lived companies (i.e., proxy for sustainability).
