### Message from the Guest Editors

Walking is the most fundamental mode of mobility, forming a component of almost all trips. Walking is healthy, inexpensive, produces no emissions, offers benefits to both individuals and the broader community, and contributes to liveable, attractive, prosperous, and sustainable cities. However, walking is often neglected in transport planning and policy development. Furthermore, pedestrians represent up to a quarter of global road trauma. Globally there are efforts to reduce road trauma and increase sustainable practices. Within the UN sustainability goals there are targets to halve the number of road-related deaths and injuries and provide access to safe, affordable, accessible and sustainable transport systems for all.

Deadline for manuscript  
submissions:

**closed (31 March 2022)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
