Modeling Pedestrian Behavior and Safety in Interactions with Conventional and Automated Traffic

Guest Editor:

Dr. Eleonora Papadimitriou

TU Delft, Faculty of Technology, Policy and Management, Building 31, Jaffalaan 5, 2628 BX Delft, The Netherlands

Deadline for manuscript submissions:

closed (15 October 2020)

Message from the Guest Editor

This Special Issue aims to highlight advances in pedestrian behavior and safety research, with a focus on the establishment of a stronger link between the understanding of pedestrian behavior when interacting with motorized traffic and the related safety implications. Research questions related to the deployment of automated vehicles and the respective changes in the expectations, risk perception, and behavior of pedestrians, as well as their safety consequences, are also relevant.

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
