Message from the Guest Editors

The original intention of this special issue is to explore new photovoltaic systems that can be interesting concepts, novel designs, and potential applications, which aims to further promote the development of solar photovoltaic techniques and correspondingly achieve fossil energy saving and greenhouse gas emissions reduction. Topics covered in this special issue include, but are not limited to, the following:

- New concepts of photovoltaic conversion system;
- Innovative cooling techniques for photovoltaic system;
- Concentrate photovoltaic systems;
- Novel building-integrated photovoltaic systems;
- Advanced materials for photovoltaic conversion;
- Recycling technique for photovoltaic modules;
- Hybrid energy system with photovoltaic conversion;
- Energy storage techniques for photovoltaic systems;
- Small and/or off-grid photovoltaic system;
- State-of-the-art reviews on photovoltaic systems

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
