Message from the Guest Editors

This Special Issue is part of a major 21st century challenge related to the need to adapt for future societies that are more resilient to natural disasters. The global cost of damage generated by natural hazards has been rising steadily for 40 years and leads us to reflect on new ways of doing things. The “post-disaster” period seems to have elements favorable to the operational implementation of actions to structurally reduce vulnerability, thus aiming to achieve better territorial resilience in the long term (political will to act, the need to rebuild damaged assets, media coverage of the crisis, etc.). Reconstruction planning can thus be approached as an opportunity to encourage the development of ideas to change the territory.

With the ambition of responding to this priority of "building back better", this Special Issue aims to highlight the development of an integrated and cross-cutting approach to improve the management of territorial reconstruction following disasters (natural hazards or anthropogenic) and encourages the publication of interdisciplinary approaches, particularly on subjects mixing urban, environmental, and societal issues.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
