Message from the Guest Editors

Dear Colleagues,

Since 1987, when the World Commission on Environment and Development defined sustainability as the “development that meets the needs of the present without compromising the ability of future generations to meet their own needs”, it has become the key to the development of our society. Sustainability is not just limited to environmental issues; it extends to economic and social concerns.

Sustainable development (SD) is a value-based concept, which requires matching the values of the organizations with those of the individuals involved in the project. Ethics, social awareness, integrity, transparency, effectiveness and efficiency, participation or respect are part of the key values of what is expected from SD. As social and political interest in sustainability grew, there was also a growing interest in its study from both an academic and practical point of view.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
