Message from the Guest Editors

In the intersection of the two, the following areas of research have emerged to be of critical importance for the scientific enterprise:

- Gender issues, reproductive health, environmental and occupation health
- Increasing mobility, migration workers and social vulnerability in relation to social health and sustainability matters
- Emerging socio-cultural and economic values in SPHS and sustainability concerns
- The role of healthcare and health services management and social sustainability
- Impacts of Social networks and technologies on social health
- Education in SPHS and sustainability
- Institutions building, regulatory frameworks and political agenda in coping with rising complexity in SPHS and sustainability problems
- Socio-economic inequality and the future of SPHS
- Information, databases and science policy in improving the knowledge base about SPHS and sustainability
- Evidence-based policymaking in SPHS and sustainability
