Deadline for manuscript submissions:

**closed (10 July 2023)**

### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to address the reshaping of our built environment for future resilience and the creation of a healthier living environment in the post COVID-19 pandemic. We brought together interdisciplinary knowledge to address these challenges at three scales: city, neighborhood, and building scale, as well as the interdependence between them. This Special Issue consists of multidisciplinary collaborative research on building services, material science, indoor air quality, and human health and modelling. Research topics such as energy and environment buildings, the outdoor microclimate, and healthy cities and buildings are important areas for the future of our wellbeing and are also scopes within the Sustainable Development Goals.

Dr. John Kaiser Calautit

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
