Message from the Guest Editors

Dear Colleagues,

Agricultural and food wastes, by-products and co-products are produced throughout the entire agri-food sector. Huge amounts of both edible and non-edible portions of agricultural products are currently underutilized or simply wasted. Therefore, sustainability issues and challenges are of primary importance in the agri-food sector. This special issue aims at gathering papers related to sustainable practices and technologies that may find application across the entire agri-food sector, and which can lead to the creation of sustainable value chains in the farming, commodity processing, and food production and distribution sector. Therefore, we believe your research might fit the Special Issue.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
