Engineering, School of  
Pedagogical and Technological  
Education, Athens, Greece

Deadline for manuscript  
submissions:

**closed (25 March 2023)**

### Message from the Guest Editors

We are pleased to introduce this Special Issue on the reliability and sustainability of reinforced concrete structures.

In spite of reinforced concrete structures not being generally the most sustainable solutions from an environmental point of view, reinforced concrete is preferred for most situations due to the other advantages that it presents. One of this is its optimal behavior in middle–high-risk seismic areas thanks to an obtainable ductility–strength combination.

Therefore, in this Special Issue, each of you is invited to propose solutions which are able to integrate sustainability and seismic reliability in the design of reinforced concrete structures and/or strategies for intervention on existing structures aiming to increase seismic reliability while avoiding the higher impact of reconstruction after demolition.

- structural sustainability
- reinforced concrete sustainability
- economy and sustainability
- life-cycle analysis
- material quality impact
- seismic behavior of sustainable concrete structures
- case studies
- improvement or retrofitting of existing structures

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
