

Renewable Energy and Energy Systems: New Concept, Design, and Optimization

Guest Editors:

Dr. Jian Zhang

Mechanical Engineering, Richard J. Resch School of Engineering, University of Wisconsin-Green Bay, Green Bay, WI 54311, USA

Prof. Dr. Heejin Cho

Department of Mechanical Engineering, Mississippi State University, Mississippi State, MS 39762, USA

Prof. Dr. Dongsu Kim

Department of Architectural Engineering, Hanbat National University, Daejeon 34158, Korea

Deadline for manuscript submissions:

closed (20 February 2024)

Message from the Guest Editors

With the rapid increase in global energy consumption and environmental pollution, renewable energy systems have received much attention recently due to their environmental and economic benefits. Many researchers have been conducting experimental and theoretical studies on various technologies such as solar thermal collector, photovoltaics, wind turbine, and so on. Additionally, governments and utility companies worldwide have proposed a large number of incentive policies to promote the implementation of renewable energy systems in the real applications.

This Special Issue aims to investigate renewable energy systems from different aspects, including new concepts, novel designs, design and performance optimizations, and potential applications. Topics include but are not limited to:

New concepts of renewable energy systems
Novel design of renewable energy systems
Innovative application of renewable energy sources
Renewable energy systems optimization
Techno-economic analysis of renewable energy systems
Distributed energy systems using renewable energy sources
Smart and/or off-grid renewable energy systems for building applications
Energy policies on renewable energy systems

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
