Deadline for manuscript submissions:

closed (31 January 2022)

Message from the Guest Editors

Globally, utilities and large industries represent a significant proportion of the world's energy consumption and affect many ecosystems. The industrial inertia to be overcome when making sustainable change is often cited as an inhibiting factor in realizing sustainable energy systems. A more holistic approach that shows multiple benefits is more likely to succeed but often relies on multidisciplinary approaches being utilized.

With a systematic approach in mind, the The focus of this Special Issue is to highlight the inclusion of novel sustainable elements in systems using large amounts of energy in utilities and industry. Contributors should champion not just the technical merit of individual elements, but also show how they balance planet, people and profit aspects in their respective systems. This Special Issue welcomes contributions that address the holistic sustainability of energy generation and industrial systems. Special attention will be given to submissions that demonstrate the use of the "triple bottom line" approach to novel large-scale industrial and utility system design and management.

an Open Access Journal by MDPI

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
