Message from the Guest Editor

Dear Colleagues,

Since the first cases were reported in December 2019, the novel coronavirus disease 2019 (COVID-19) has swept across the globe, which has had a large impact on all industries. Among them, global supply chains (GSCs) are facing demand–supply disruptions all across the world. Global and local economies are severely affected by coronavirus outbreaks and thus supply availability has been reduced and misbalanced, with a rising demand for essential goods. Although many studies have been published to explore this, the resilience of supply chains during COVID-19 remains unclear.

At present, how to restore the resilience of supply chains is urgent. Building resilience in post-COVID-19 supply chains, including in the risk management of post-COVID-19 supply chains; disruption risk management in post-COVID-19 supply chains; the resilience of chain operations in post-COVID-19 supply chains; robustness in post-COVID-19 supply chains; corporate social responsibility in post-COVID-19 supply chains; global logistics operations in post-COVID-19 supply chains; emergency management in post-COVID-19 supply chains, etc.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
