Message from the Guest Editors

Dear Colleagues,

Sustainability sciences have proven crucial in supporting policy makers to make informed decisions. However, with regards to formulating scientifically supported resources policies that are equitable and sustainable, much work remains to be done to support the magnitude and urgency of transformation needed to match the sustainability challenge. This Special Issue aims to address this gap.

We invite authors to submit literature reviews, policy analysis, and original research. We particularly welcome work that addresses the link between policy and sustainability science directly. We welcome both reviews of literature, and science-informed policy. Scientific studies are expected to discuss their policy relevance, implementation, and challenges directly. Methods can include both quantitative approaches (e.g., I/O, MFA, LCA, system dynamics, and agent-based modelling) and qualitative approaches (e.g., case studies or conceptual work addressing emerging policy fields such as circular economy). Policy studies are expected to reflect scientific advancements.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
