### Message from the Guest Editors

This Special Issue originated from the increased concern associated with the recent pandemic climate worldwide and its impacts and risks on the sustainability of projects in the architecture, engineering, and construction (AEC) industry. The overall focus of this Special Issue is on methodologies and approaches to account for foreseeable and unforeseeable risk, and how it impacts sustainability decisions related to the design, operation, and management of building and infrastructure projects. The Special Issue will also examine the Sustainable Development Goals (SDGs) of the United Nations (UN) and the various risks that impact the ability of AEC organizations to satisfy the SDGs.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
