**closed (15 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

The great challenge of our time is to create a sustainable and desirable future—one that achieves Sustainable Development Goals (SDGs). In today's "Anthropocene" world, human impacts on ecological life support systems are increasingly complex and far-reaching. At the same time, there are increased demands on the planet's life support functions to maintain living standards in developed nations, and to reduce poverty in developing nations. In this "full" world, the emphasis in research, education, and policy needs to shift from addressing problems in isolation to studying whole, complex, and interconnected systems and the dynamic interactions between the parts. Several scholars have focused on how the concepts of vulnerability and resilience may be employed in the analysis of and to ensure future sustainability and wellbeing. Various approaches have been proposed, concerning different fields of applications spreading from environmental to financial settings.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
