Message from the Guest Editor

We are in an era of disasters. A UN report confirmed how extreme weather events have increased over the last 20 years. If this trend continues, some scientists expect future disasters to devastate rural communities in particular. Unfortunately, many rural communities already struggle with factors that make bouncing back after disasters difficult, including higher rates of poverty, disability, limited access to healthcare and broadband services. To avoid or minimize the long-term effects of disasters, rural communities must focus on strategies to increase resilience.

Resilience is often described as the ability to anticipate, prepare, and plan for disasters so that a community can absorb the consequences and more adequately recover. Effective disaster resilience planning assesses the risk, then prioritizes community needs and values in reducing risk. Unfortunately, too often rural communities do not have the capacity or resources necessary to become more resilient.

The focus of this Special Issue is to provide a better understanding of the barriers to enhancing resilience in rural communities and illuminating promising strategies for enhancing resilience.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
