Security, Chung-Ang University

Deadline for manuscript  
submissions:

**closed (10 July 2023)**

### Message from the Guest Editor

The hyper-connected computing environment connects the real world and the virtual world to create a new convergence space called the cyber-physical space (CPS). In the cyber-physical space, innovative and new value that has never been seen before can be created. New values come in the form of converged product and service, such as connected cars, smart factories, and personalized healthcare. Together with innovative values, cyber-physical spaces face various types of security risks. For individuals or organizations to continue to grow, they must proactively respond to the complex risks that may arise in new spaces.

This Special Issue discusses security management and services to minimize risks that may occur in future cyber-physical space. Ultimately, the Issue provide the best security strategies for stable growth in the upcoming 4th industrial revolution era.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
