### Message from the Guest Editors

Dear Colleagues,

Over the past decade, the discourse on social enterprises has emerged as a powerful intervention for ameliorating socio-economic challenges in communities worldwide. Given the increasing gaps in the delivery of public services around the world, social enterprises are now being called upon to tackle these institutional voids through innovation in practice. There is a range of debates regarding the business models of social enterprises but all manifestations potentially align with the UN sustainable development goals, and could be the drivers of creativity and innovation that will lead to more sustainable and resilient communities.
