Message from the Guest Editors

Dear Colleagues,

The governance of urban sustainable development and climate adaptation has become an important challenge for decision-makers and researchers. In this regard, participatory governance is considered a key aspect for strengthening democratic engagement and legitimizing governmental action.

This Special Issue aims to reflect on the different notions of “participatory governance” in different social and cultural contexts, which modes of participatory governance exist, and in how far they carry transformative potential for different types of change. Therefore, the Special Issue aims to explore to what extent participatory governance can trigger the development of social innovation in times of crisis—such as (but not limited to) climate change. We would like to encourage researchers to discuss theoretical and empirical results in the field of urban climate adaptation and/or sustainability in large and smaller cities as well as townships.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
