Message from the Guest Editor

This Special Issue aims to accommodate research on socio-economic functions across sustainable farmland systems, with a focus on, but not restricted to, practices, policies, and planning for environmental conservation in agriculture, climate-smart agriculture, conventional and biotechnological agriculture which not only mitigate and/or adapt to the challenges of climate change, natural disasters, food insecurity, and conflict but also boost nature-positive production, stabilizes production, and improve the welfare of the producers; processing and marketing of farm produce which ensure the livelihood of the producers, processors, and consumers, and access to safe and nutritious food; integration of nonfarming with farming activities; and building of a society resilient to all kinds of crises and hazards/conflicts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
