Message from the Guest Editors

Dear Colleagues,

Sport in general, and sports practice in particular, have established themselves as a social fact in the world. Understanding this situation from the perspective of social benefit is one of the main objectives and analysis of sports policies.

In addition, sports practice is also an important vehicle that favors social relationships, generating continuous situations that facilitate the creation of contacts and relationships that favor socialization, and consequently, the creation of groups that share concerns, interests and values, but that end up generating a relationship of trust and social cooperation.

The issue invites disciplinary specific and multidisciplinary contributions, including but not limited to the following topics:

- Sport and leisure
- Social relations and sport
- Sport and quality of life
- Sports and leisure policies
- Social development and sport
- Physical education and social relations
- Social relations and motivation towards sports practice
