### Message from the Guest Editor

In this special edition of *Sustainability* we seek to explore these popular linear attractions from the perspective of their potential to promote sustainable local economies, environments and experiences using a range of case-study based and more theoretical studies of the concept of the route or trail and their functions and impacts within their wider social, cultural, economic and ecological environment. A particularly under-researched area is the experience of trail and route users and so we would welcome papers that address this area or any other related fields as above.

Keywords:

- Tourist trail
- Themed route
- Sustainable routes and trails
- Trails development
- Trail and route users' experience
- Routes trails and their communities
- Impacts of tourist routes and trails
