### Message from the Guest Editors

Dear Colleagues,

The circular economy (CE) and resilient supply chains (RSCs) have gained attention in political and business communities because of global development trends in sustainability and changes in modern social-economic requirements. The CE promotes new economic and business opportunities as it seeks to encourage more resource transitions. It is crucial to integrate CE ideas in modern supply chain management. In the last two decades, a number of practical and academic studies have raised concerns about disruptions in the supply chain process. These disruptions can stretch requirements to build more resilience in supply chains.

- How can we integrate a circular economy with resilient supply chains?
- What are the challenges, benefits, opportunities, and facilitators to integrate a circular economy with resilient supply chains?
- How can organizations obtain benefits from the integration of a circular economy and resilient supply chains?

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
