### Message from the Guest Editors

Dear Colleagues,

COVID-19 pandemic has caused many uncertainties and challenges in business supply chain operations. Besides, many governments have abandoned their 'Zero-COVID' strategy. Moreover, new variants of the coronavirus keep appearing, such as the Delta variant and the Omicron variant. For a long time in the future, everyone needs to adapt this 'new normal', and organizations must face and continuously deal with these COVID-19 uncertainties and challenges to enable a sustainability post COVID-19. Therefore, we would like to invite scholars to rethink about the ways to manage / mitigate the impacts of COVID-19 pandemic on supply chains in industry 4.0.

Managing supply chain uncertainty may provide valuable insights into supply chain management in the post-COVID-19 business environment. The objective of this Special Issue is to investigate the role of relevant new technologies and / or mitigation strategies in facilitating and managing sustainable supply chain issues in organizations. We welcome both novel conceptual paper and empirical studies addressing sustainability issues in the post-COVID-19 business environment.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
