Message from the Guest Editors

Dear Colleagues,

Due to its function as an interface between theoretical/planning disciplines and the resulting constructions, the field of construction management and engineering plays a core role in the construction industry and is of great importance across all types of construction (building construction, civil engineering works, infrastructure construction, etc.). The current global situation regarding climate change, economic crises and social injustices obliges the construction industry to contribute to a "sustainable development", due to its wide-ranging influence, especially in the field of construction management and engineering.

Therefore, the objective of this Special Issue is to gather original contributions and review articles focusing on sustainability aspects (environmental, economic and social) of different construction management and engineering perspectives and disciplines

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
