

Sustainable Construction Management and Computer Simulation

Guest Editors:

Prof. Dr. JeongWook Son

Department of Architectural and Urban Systems Engineering, College of Engineering, Ewha Womans University, Seoul 120-750, Republic of Korea

Dr. Byungjoo Choi

Department of Architectural Engineering, Ajou University, Suwon 16499, Republic of Korea

Dr. Sungjoo Hwang

Department of Architectural and Urban Systems Engineering, Ewha Womans University, Seoul 03760, Republic of Korea

Deadline for manuscript submissions:

closed (31 July 2023)

Message from the Guest Editors

The purpose of the Special Issue is to publish state-of-the-art computational research trends and results in the context of sustainable construction management. The Special Issue focuses on, but is not limited to, computer simulations such as discrete-event simulations, system dynamics, agent-based simulations, and hybrid simulations used in computational research methods. Research focused on emerging technologies such as data mining, artificial intelligence, image processing, and big data to enhance performance in combination with simulations is also welcome.

Topics

- Sustainable construction management
- Life-cycle assessment
- Lean construction
- Off-site construction
- Prefabrication
- Sustainable supply chain management
- Sustainable construction method
- Sustainable construction site management

Computational research methods

- Computer simulation
- Discrete-event simulation
- System dynamics
- Agent-based simulation
- Hybrid simulation
- Data mining
- Artificial intelligence

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
