Message from the Guest Editors

Dear Colleagues,

Developing a resilient and sustainable system that can last throughout its life cycle has become more challenging in this new era of uncertainty. This Special Issue seeks submissions that highlight innovative sustainable design and life cycle engineering frameworks that can guarantee the system's proper functioning under external and internal disturbances and uncertainties. Research areas may include (but are not limited to) multidisciplinary practices from the broad research areas of data (or big data) analysis, decision analysis, design optimization, system engineering, and uncertainty analysis.

I look forward to receiving your contributions.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
