### Message from the Guest Editors

This Special Issue aims at attracting original high-quality papers and review articles focused on control techniques for power electronics applications applied to hybrid energy systems coupling renewable energy sources, hydrogen technologies, and energy storage devices.

Prospective authors may submit contributions dealing with (but not limited to):

- Development of new control techniques for power electronics applications.
- Energy management of hybrid electrical systems.
- Development of new power electronics topologies.
- Fault-tolerant topologies and control.
- Reliability of power electronics.
- Integration of hydrogen technologies in hybrid electrical systems.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
