### Message from the Guest Editor

This Special Issue entitled Sustainability in Textiles aims to promote science- and research-based findings on the impact of textiles on nature and science-based predictions and assessments of global change and the direction we as humankind should move to sustain our planet.

Research areas:

- Raw materials for the textile industry, including production and processing issues;
- Textile production and processing, including water consumption, chemical additives, dyeing, and finishing in all textile branches, including technical textiles, geotextiles, etc.;
- Washing and microfibers (pollution of water);
- Degradation;
- End-of-life, chemical and mechanical recycling, upcycling, closing the loop, and circular economy;
- Fast fashion and overproduction/current business models and practices.
