Message from the Guest Editor

This Special Issue entitled Sustainability in Textiles aims to promote science- and research-based findings on the impact of textiles on nature and science-based predictions and assessments of global change and the direction we as humankind should move to sustain our planet.

Research areas:

- Raw materials for the textile industry, including production and processing issues;
- Textile production and processing, including water consumption, chemical additives, dyeing, and finishing in all textile branches, including technical textiles, geotextiles, etc.;
- Washing and microfibers (pollution of water);
- Degradation;
- End-of-life, chemical and mechanical recycling, upcycling, closing the loop, and circular economy;
- Fast fashion and overproduction/current business models and practices.

an Open Access Journal by MDPI

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
