Message from the Guest Editors

Driving is a major part of many people's lives. Most people who own a car use it on a daily basis to work, visit friends and family, and many other tasks. Mobility is a desirable luxury, and so it is understandable that many people invest in automobiles. Driving is referred to as the primary task, while interacting with the infotainment system is referred to as the secondary task. This Special Issue will deal with some of the most important aspects related to the design of interfaces for infotainment systems in cars and the development of technology for intelligent vehicles.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
