Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

The promotion of renewable energy is considered one of the most effective strategies to cope with climate change. In terms of greenhouse gas (GHG) emission saving, renewable energies are superior when compared to traditional energies (e.g., fossil fuel, coal). Among different kinds of renewable energies, bioenergy has attracted public attention during the worldwide energy transition. Over the last decade, we have witnessed a rapid growth in bioenergy production, driven by social and economic factors. However, this development has also resulted in significant impacts on land use patterns and the regional environment. In particular, the increasing demand for agricultural-based feedstock reflected in the changing agricultural landscape has led to significant biodiversity loss, ecosystem service decline, and food security. Given the complex nature of bioenergy systems, the impacts show high spatial and temporal heterogeneities and require both short- and long-term evaluation. Thus, the sustainability of bioenergy production has been the subject of long-term debate.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
