Message from the Guest Editors

Current labor migration flows in Europe, including their extent and intensity, have been largely shaped over the last three decades under the influence of political and economic changes in the countries of Central and Eastern Europe.

The examination and evaluation of labor migration in Europe still remains in most cases just at an empirical level and does not delve into macroeconomic and political analyzes and generalizations. That means that the results of the existing studies do not fully answer questions such as: in which direction are labor migration flows evolving and how do they subsequently affect economic and social development in both migrants' countries of origin and destination countries? To what extent are these labor migration flows and economic growth sustainable in the long term? How are these processes evolving and what are the projections for their development in the future?

The aim of this Special Issue is to advance the examination of the impact of labor migration on economic growth and place it into a more comprehensive macroeconomic context.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
