Message from the Guest Editors

Over the past 40 years, the world has experienced a steady increase in global greenhouse gas (GHG) emissions, considered the main factor responsible for climate change. The improvement of the level of companies' supply chain sustainability is deemed to be a fundamental strategic action toward the achievement of the goals of sustainable development. In fact, logistics and supply chain activities are responsible for at least one third of energy consumption and one third of GHG emissions. To mitigate these impacts, it is important to take a systemic approach to a transformational change of our supply chains, from production to distribution, to make them more sustainable. The impact of logistics and supply chains on sustainability should not be tackled just from an economic and environmental perspective, but also from a social perspective, which includes issues related to work conditions, employability, and equality.

The aim of this Special Issue is to provide valuable insights into Sustainability in Logistics and Supply Chains, with a specific interest in methods, empirical evidence and applications, simulations, as well as conceptual frameworks.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
