Message from the Guest Editors

Dear Colleagues,

Cities are increasingly defined by digital mechanisms, platforms, and services—referred to collectively as ‘urban technologies’—many of which promise to address the global environmental crisis.

We solicit papers that address urban technology and the climate crisis in four cross-cutting domains: urban (1) economics, (2) governance, (3) form/development, and (4) data. Papers should not focus specifically on ecological science, technical models, or abstract agendas. Rather, we seek contributions that focus on real-world implementation and implications of urban technologies and environmental policies.

The issue is topical—as climate collapse accelerates, sustainability is becoming a mainstream focus in political agendas. Furthermore, post-pandemic recovery will demand critical decisions and investments at municipal, federal, and international levels that could mark a new phase of urban technology and climate politics. This Special Issue will elevate urgent discussions, bring an academic lens to real-world crises, and illuminate new pathways to a more sustainable future.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
