Message from the Guest Editor

Dear Colleagues,

For organizations introducing sustainable practices, one of the vital spheres is the one that concerns employees and their management. The concept of sustainability is closely intertwined with an organization's economic, social, and environmental processes. Different aspects of sustainability can be interlinked and essential for organizations (e.g., the aspect of the business as a whole and the aspect of various stakeholders of the company). However, the main focus of this Special Issue will be on sustainability in working environments.

The Special Issue aims to provide new insights into sustainability-related practices in light of human resource management, leadership, internal communication, corporate culture, ethical climate, corporate social responsibility practices, employee well-being, corporate culture, employee stress and recovery issues, and other sustainable employee-related practices that can impact on economic, social, and environmental dimensions of organizations.

We are looking forward to both original empirical research manuscripts and the papers that will synthesize recent research and highlight important directions of future research.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
