Deadline for manuscript submissions:

closed (30 September 2022)

Message from the Guest Editors

Sustainable built environments are intended to include construction works and projects that do not harm the three pillars of sustainable development, which are environment, economy, and social life. However, the built environment continues to deplete resources, consume large amounts of energy, and generate greenhouse gas emissions, and construction of the built environment is known as one of the hazardous industries. Resource- and energy-efficient practices, adoption of advanced construction technologies, and innovative construction delivery methods are only some of the noteworthy attempts that have been made to date in combating the sustainability issues caused by the industry. The proposed Special Issue offers an opportunity for researchers to disseminate their findings. The Special Issue also provides a good opportunity to understand how the sustainable development of the built environment has been affected by the ongoing COVID-19 pandemic economically and socially. The Special Issue particularly seeks studies that focus on the use of advanced construction technologies, materials, and methods that can benefit the industry worldwide.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
