Message from the Guest Editors

Dear Colleagues,

Logistics is a key activity in urban areas, due to its key role in the economic growth of a city, but also to its externalities (e.g., traffic congestion, pollution, noise) affecting the quality of life of citizens.

This Special Issue aims to focus on the new business and operational models emerging in planning and managing city logistics while considering the environmental, social and economic aspects related to the sustainability of the logistic system.

Covered topics include (but are not limited to) green routing, green logistics, city logistics applications, smart mobility, environment 4.0, business models in urban logistics, synchromodal transportation, multimodal transportation.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
