Message from the Guest Editors

Addressing climate change is inseparable from our efforts to achieve sustainable development. Climate change has significantly impacted our environment, economies, and society. At the same time, human activities, such as population increase, urbanization, and industrialization, have accelerated climate change. Thus, an interdisciplinary approach that incorporates not only scientific aspects but also socioeconomic factors is crucial for addressing climate change as well as achieving sustainable development.

An important factor will be the changes in the demographic structure of countries. In recent years, the Asia and Pacific region, home to more than half of the world's population, is undergoing rapid demographic changes. Many of the current GHG emission forecasts are based on somewhat outdated population projections, and this may lead to ineffective policy prescriptions. Therefore, reflecting the recent trends of demographic changes in many economies on GHG emission scenarios and climate policies will be essential for the effective implementations of the Paris Agreement.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
