Message from the Guest Editors

Coal measure resources primarily include coal-hosted critical metals (such as rare earth elements, lithium, zirconium, gallium, germanium, etc.), coal measure gases, bauxite, claystone, special coal species (oil-rich coal, liquefaction coal, gasification coal, and coking coal), oil sand, among others, in coal-bearing strata as well as coal combustion products (CCPs). This Special Issue aims to discuss the distribution, formation, and utilization of coal measure resources. We cordially invite prospective authors to contribute either original research articles or review articles dealing with broad range of topics including, but not limited to, the following areas:

- (1) Distribution and formation of special coal species;
- (2) Mineralogical characteristics of metalliferous coals;
- (3) Coal-hosted critical metals: distribution, modes of occurrence, and enrichment mechanisms;
- (4) Recovery of critical metals from coal-bearing strata and coal combustion products (CCPs);
- (5) Bauxite, claystone, and other resources in coal-bearing strata;
- (6) Characterization of coal measure gases;
- (7) Clean utilization of special coal species (liquefaction coal, gasification coal, coking coal).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
