Message from the Guest Editors

The COVID-19 pandemic caused a substantial disturbance to societies' lives and livelihoods, causing us to reevaluate the whole common existence of humans worldwide. Additionally, the novel coronavirus has been a critical obstacle to attaining the United Nations Sustainable Development Goals (SDGs) embraced in September 2015 and set to be reached by 2030. Prior to COVID-19, most nations were progressing towards the SDGs, but the ongoing turning point is imperiling years of advances, postponing the crucial shift to low-carbon, resource-efficient and socially inclusive economies. The monetary and societal perturbation caused by the pandemic is overwhelming, and numerous individuals are at risk of falling into severe deprivation, while many enterprises are struggling with the economic failure. The imposed lockdowns drastically lowered human activities, thus causing a transient drop in greenhouse gas discharges, but as the world recovers from the disease, emissions are expected to soar. Henceforward, sustainable and resilient strategies are vital for a healthy and green restoration from the COVID-19 pandemic and the SDGs are essential to this process.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
