Message from the Guest Editors

Use of energy is a major driver of human development and has consequences for people at all levels of society. Energy use includes both energy supply and energy consumption at various scales and in different sectors, i.e., for communities, industries, or in regional or national contexts. However, sources of energy for essential use are often scarce due to many constraints, especially in developing countries. In addition, a range of challenges are linked with energy use if not implemented sustainably. Sustainable energy supply and consumption are directly linked to the UN Sustainable Development Goal, *SDG 7: Ensure access to affordable, reliable, sustainable and modern energy for all*, and associated with several other SDGs, as well as being key factors in addressing the global climate change challenge.

This aim of this Special Issue is to foster discussion on pathways to sustainable energy use for all levels of society and how its promotion can contribute to meeting the global energy and climate change challenges. Results from case studies, comparative studies, and research encompassing both sustainable energy supply and sustainable energy consumption are welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
