Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

Governance plays a critical role in protecting natural resources, achieving environmental sustainability, and dealing with climate change. Governance refers not only to the actions of government officials but also to the entire political ecosystem of interest groups, businesses, nonprofits, and others who help to determine environmental policy. This Special Issue will examine the pathways and obstacles to successful environmental governance practices.

We are open to research methodology and orientation. We welcome papers that advance our existing theoretical framework, as well as empirical works that expand our current understanding. We also welcome papers that examine environmental governance in other realms that are not covered by our research questions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
